PAPER IN PROGRESS

Do Private Bankers Add Value?

Using novel data from South Korea's largest bank, we examine whether private bankers create measurable value for retail investors. Clients advised by private bankers exhibit a 24% lower disposition effect and, among elderly clients, face fee burdens reduced by roughly 8 bps. These benefits weaken when private bankers face branch reassignment or retirement, consistent with an incentive-based mechanism. The findings highlight how intermediary incentives shape the extent to which financial experts deliver value rather than extract rents.

RESEARCH EXPERIENCE

Research Assistant to Prof. Jaewon Choi, Seoul National University

Project 1: *Natural Disasters and Municipal Bonds* (with Professors Tatyana Deryugina et al.) Aug 2025 – Present
- Empirical finance project evaluating the pricing impact of natural disasters in U.S. municipal bond markets
- Extended the working paper's main analyses with updated datasets, testing alternative model specifications and outcome definitions to ensure robustness

Project 2: *Mutual Funds* Sep 2024 – Present
- Constructed a large-scale dataset (300GB+) using Python, Stata, SQL, and API pipelines
- Performed preliminary empirical analyses to support multiple ongoing research projects

Project 3: *Nudge Intervention in Retail Investment* (with Professors Syngjoo Choi, Chamma Yoon) Nov 2024 – Dec 2025
- A behavioral nudge-based quasi-experiment embedded in product sales process at South Korea's largest commercial banks to mitigate mis-selling of high-risk financial products and improve consumer protection
- Contributed to intervention design and led data collection and empirical analysis for internal policy evaluation and academic research purposes
